

Ali Tavousi

Front-End Developer

Isfahan, Iran | +98 916 293 2329 | Alitavousi83@gmail.com | [linkedin.com/in/alitavousi83](https://www.linkedin.com/in/alitavousi83) | github.com/alitavousi83

PROFESSIONAL SUMMARY

Front-end developer who builds responsive, mobile-friendly websites with HTML5, CSS3, JavaScript (ES6+), and Bootstrap, managing all work through Git and GitHub. Completed a Six-month C++ internship at Parvaz Control Sepahan that established disciplined debugging, code-review, and problem-solving habits. and accredited certifications in web design, advanced CSS, and JavaScript. Currently focused on building responsive web applications with modern JavaScript while continuing to expand my front-end development skills.

TECHNICAL SKILLS

Front-End Technologies: HTML5, Semantic HTML, CSS3, Responsive Web Design, Bootstrap 5, DOM Manipulation

Programming Languages: JavaScript (ES6+), C++, MATLAB

Version Control: Git, GitHub

Design: UI Design Principles, Adobe Photoshop

Tools: Microsoft Word, Excel, PowerPoint (ICDL certified)

PROJECTS

RideXpress — Intercity Ride-Booking Website github.com/alitavousi83/RideXpress

- Developed a multi-page responsive website (home, travel request, gallery, timeline, about, contact) with semantic HTML5, CSS3, and Bootstrap 5, laid out mobile-first so every page works on phone, tablet, and desktop screens.
- Used CSS custom properties to keep colors, spacing, and typography consistent and maintainable across all pages.
- Implemented interactive features in vanilla JavaScript (ES6+): DOM manipulation for dynamic, filterable announcement cards, client-side form validation with regular-expression phone-number checks, and localStorage persistence for user submissions.
- Escaped user-submitted text before inserting it into the DOM to reduce the risk of HTML injection.
- Organized JavaScript by page and feature with shared utility functions, and versioned and published the full codebase on GitHub.

EXPERIENCE

C++ Programming Intern

Parvaz Control Sepahan — Isfahan, Iran (Hybrid) | Feb 2023 – Sep 2023

- Practiced C++ fundamentals — object-oriented programming, data structures, and program logic — through structured exercises reviewed by senior developers.
- Debugged and revised code based on mentor feedback and code review, building systematic troubleshooting habits and a readable coding style.
- Communicated progress and coordinated deadlines in writing while working mostly remotely.

EDUCATION

Bachelor of Science in Mechanical Engineering (Not Completed) — University of Isfahan | 2022 – 2025

CERTIFICATIONS

Web Development (TVTO): [Web Design Fundamentals \(HTML5, CSS3\)](#); Website Template Design with CSS; Applied Web Development (HTML, CSS, JavaScript)

Web Development (Finca Academy): [HTML & CSS](#); [Advanced CSS](#); [JavaScript](#)

Computer & Design (TVTO): [ICDL Level 1](#); [ICDL User](#); [Fundamentals of Robotics](#); [Adobe Photoshop Operator](#)

HONORS

- 1st Place, Mechanical Engineering Design Olympiad, Isfahan Province — 2025
- 9th Place, National Mechanical Engineering Design Olympiad, Iran — 2025
- 1st Place, Blog Design Competition, Isfahan Province — 2018
